

	PRIMERS	
Product Name	SOPRADERE	SOPRADERE QUICK
Photo		
Description	Cold-applied primer based on bitumen and volatile solvents. This primer ensures proper adhesion to substrates (concrete, metal, or wood) before the installation of welded or bonded bituminous waterproofing membranes. Also suitable for use on existing bituminous waterproofing systems with a slate chip or granule finish.	Fast-drying, cold-applied primer based on bitumen and volatile solvents. This primer ensures proper adhesion to substrates (concrete, metal, or wood) before the installation of welded or bonded bituminous waterproofing membranes. Also suitable for use on existing bituminous waterproofing systems with a slate chip or granule finish.
Drying time (depends on temperature and relative humidity)	 ± 3 h.	 ± 30 min.
Consumption (indicative value)		
Flash point °C		
Operating temperature °C
